

RotoSpa pH Minus

Features/Characteristics

- Granular
- pH reducer

Use for reducing Total Alkalinity

Ideal pH Range: 7.2 – 7.6

Test the pH of your spa water and if it is above 7.6, use RotoSpa pH Minus to lower it. Spa pH Minus can also be used for lowering Total Alkalinity if it rises above 150mg/l (ppm).

Application Instructions

1. Pre-dissolve the product in a clean plastic container at a maximum rate of 10g of product per 0.2 gallons (1ltr) of clean warm water. Stir well to ensure product is fully dissolved. Carefully add the resulting solution to the spa whilst the pump(s) are turned “on”. If you are reducing Total Alkalinity, pour the solution in one area in the middle of the spa.
2. After a minimum of 30 minutes, recheck the pH/Total Alkalinity level and if necessary repeat the treatment until the ideal pH/Total Alkalinity is established.

pH Dose Rates		
Litres	Gallons	Dose Rate
1000	220	11g
1.500	330	17g

Dose rate to lower total alkalinity			
Litres	Gallons	10mg/l	25mg/l
1000	220	25g	63g
1.500	330	38g	95g

Please Note: a Number of treatments may be required
